

Brent F. Goodfellow
Partner

Brent provides expert technology services to Fordham Goodfellow clients as the partner-in-charge of its technology division, One Tech. As a Certified Public Accountant and a Microsoft Certified Systems Engineer, Brent enjoys demonstrating to clients how investments in technology can improve overall business results.

Brent started his career in accounting as a professor at Portland Community College and as a president of his own accounting and consulting firm. However, after being frustrated with the service and results he was experiencing with technology providers, he decided to become a certified technology professional himself.

Since merging his company, Goodfellow Consulting, with Fordham & Fordham in 2000, Brent has focused his practice on technology consulting. He works with clients to understand the pains and challenges of their businesses and identifies technology services that enable businesses to realize their potential.

However, Brent still uses his training and experience as a CPA. Brent brings the professionalism and dedication of a CPA to his service delivery as a technology provider. His background provides clients with a better service experience, as well as more realistic cost and time estimates.

Brent's technology services include comprehensive technology reviews; telephony and unified messaging system selection and implementation; hardware and software selection and maintenance; technology training; technology security and disaster planning; and outsourced network administration.

Brent's knowledge of the technology industry has been recognized by numerous regional, state, and national associations, which have featured him as a speaker on topics such as, Network Administration Techniques, Remote Access to Network Resources, Telecommuting and CTI, Using Outlook, What's New From Microsoft and Using Microsoft CRM.

Brent is also a recognized leader in the accounting industry. As an active member of the Oregon Society of CPAs, Brent has served in leadership positions in the organization since 1982. Most recently, he has served as treasurer, director on the board of directors, and president of the Society. Brent has also held national leadership roles in the American Institute of CPAs and has served on the National Advisory Board for Creative Solutions, Inc.

Brent's knowledge of and expertise with technology solutions is showcased in a monthly podcast (Tech2Go) sponsored by ADP, the column he writes for *The CPA Technology Advisor* and in articles he writes for the *Oregon Certified Public Accountant*.
